

HISTOPATHOLOGY REPORT

PATIENT NAME: **Tonnise Danquah**

GENDER: Male	AGE: 18 years old	FOLDER #: FLD-001	PATHOLOGY #: PT-045
DATE RECEIVED: 2022-07-10	DATE REPORTED: 2022-07-12	DATE EDITED: 2022-07-11	

RELEVANT CLINICAL HISTORY:

PROVISIONAL DIAGNOSIS:

REQUESTING DOCTOR:

REQUESTING FACILITY: **Manna Mission Hospital**

MACROSCOPIC DESCRIPTION

Type of Surgery:

Specimen Type:

Site of Tumour:

Maximum Tumour Diameter:

Distance of Tumour to Nearer Longitudinal Margin:

Tumour Perforation (pT4):

RECTAL TUMOURS

Rectal Tumours: **Not Applicable**

Is The Mesorectum Intact?

Gross Appearance of Adjacent Mucosa:

Gross Appearance of Adjacent Serosa:

Origin and Number of Blocks:

Total Number of Blocks Taken:

MICROSCOPIC DESCRIPTION

Tumour Type:

Differentiation (GRADE) by Predominant Area:

Microscopic Tumor Extension(state):

Maximum Distance Beyond Muscularis Propria:

Pre-operative Therapy:

MARGINS

Tumour Involvement of Margins:

LYMPH NODES AND OTHERS

Number of lymph nodes:

Number of involved lymph nodes:

Highest node involved:

Deepest level of venous invasion:

Perineural invasion:

SEPERATE ABNORMALITIES

Tumour deposits:

Tumour budding:

HISTORY FEATURES SUGGESTIVE OF MICROSATELLITE INSTABILITY

Intratumoral Lymphocytic Infiltrates (ILI):

Peritumor Lymphocytic Response (Crohn-like response):

TUMOR SUBTYPE AND DIFFERENTIATION

Mucinous Tumor Component:

Specify Percentage: %

Medullary Tumor Component:

High Histologic Grade (Poorly Differentiated):
